

# KONSTANT®

**Innovative** Solutions  
for Storage and  
**Material Handling**  
**Systems**

KONSTANT provided a turnkey solution for this multi-level Pick Module - integrating rack structures, flooring, dynamic storage products and conveyor systems to create a full case and split case distribution system.

# Innovative Solutions for Storage and Material Handling Systems

## PROFILE

KONSTANT is a total storage solution provider, having served the material handling industry for over twenty years. As a designer, manufacturer and integrator, we are an industry leader with an enviable track record for quality products and exemplary customer service.

For more than five decades KONSTANT engineers have designed innovative products, many of which are industry standards today.

- First step beam
- First drive in rack
- First recessed frame
- First rack supported building
- First push back rack

The spirit of innovation continues today as we develop new and exciting products like Pallet Runner™, Protect-It® and our new bolted tear drop frame.

The goal of KONSTANT is simple: to provide our customers with the very best solution for their material handling needs. This approach drives our success. We take equal care of our customers, our employees, and developing and manufacturing our products. We constantly strive to improve our products, our people and our processes.

Our customers put it best when they say, "KONSTANT rack systems are simply the best."

The KONSTANT structural Beam to Column connection is simple, dependable and strong.

KONSTANT engineers have developed North America's finest Bolted Rack system.

KONSTANT Push Back is recognized as the best in the industry.

**PALLET STORAGE SYSTEMS - STATIC SOLUTIONS**

Very Narrow Aisle (right) and Two-deep Reach Rack (below) increase storage density and product selectivity. KONSTANT's experienced designers and engineers apply their knowledge of products and processes to determine the best solution for your storage needs.

Since designing the first Drive In rack more than forty years ago, KONSTANT engineers continue to develop the most durable and reliable systems available.

KONSTANT's extensive range of integrated pallet storage systems offers safe, durable and innovative solutions for all varieties of warehousing needs.

Selective rack, Very Narrow Aisle (VNA) Rack, Two Deep Reach Rack and Drive In Rack offer effective and economical storage, while minimizing initial investment. When required in a particular application, KONSTANT has designed significant innovations, such as the recessed upright frame and the snap-in structural cross bar.

KONSTANT is the undisputed leader in the design of dynamic pallet storage systems. Push Back Rack, Pallet Flow Rack and Pallet Runner™ provide unparalleled combinations of product density, SKU selectivity and warehouse productivity.

By automatically presenting the pallet at the aisle – in either First In First Out (FIFO) or Last In First Out (LIFO) sequence – product movement is accelerated and damage is minimized.

The KONSTANT team has extensive experience in designing, manufacturing and installing the most effective storage solution for every type of warehousing need.

KONSTANT push back rack – with rugged structural steel carts and precision wheels – is the most reliable in the industry.

## PALLET STORAGE SYSTEMS - DYNAMIC SOLUTIONS

KONSTANT's innovative design, thorough project management and experienced installation enabled the world's largest Pallet Flow (left) system to be completed on time and on budget.

The KONSTANT Pallet Runner™ is the ideal solution for high volume, fast moving warehouses.

## SPECIALTY RACK STRUCTURES

KONSTANT Furniture Cantilever rack delivers superior performance by combining a robust design with a completely open storage shelf.

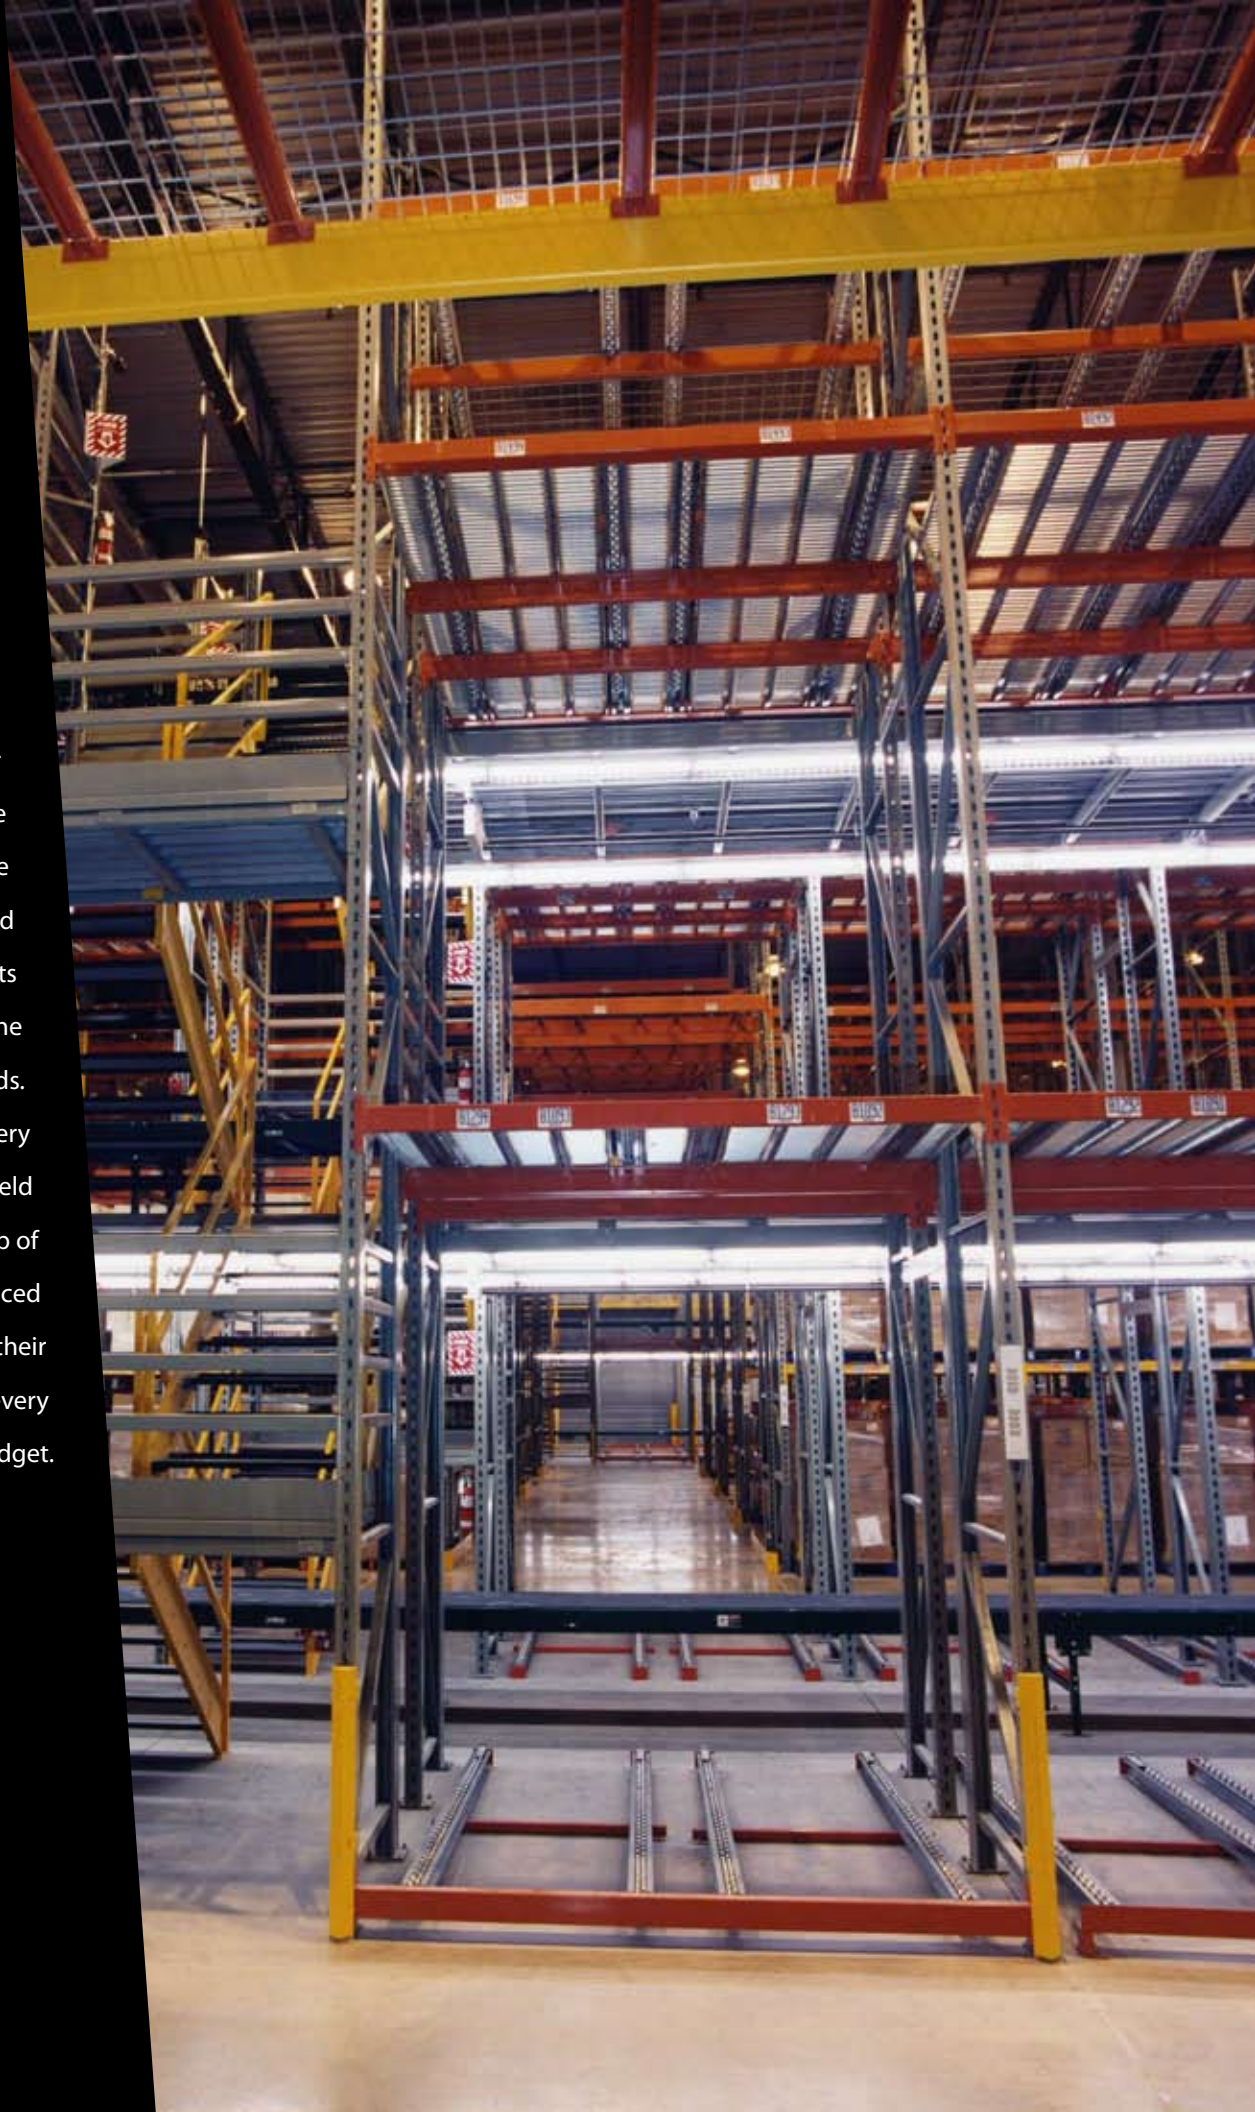

KONSTANT engineers designed the very first Rack Supported Building. The strength of our rack easily supports the roof and walls of this freezer, creating an economical storage solution.

Two Deep Pallet Flow showing product and egress points.

The KONSTANT team has the experience necessary to carefully analyze every situation, and provide the best turnkey solution. Our licensed engineers have a thorough knowledge of design standards and codes. All of our products are manufactured to the highest industry standards.

Every component, every pound of steel, every weld carries the quality stamp of KONSTANT. Our experienced installation crews make it their business to complete every project on time and on budget.

A well-designed material handling system integrates ideas and components to provide the most cost effective solution for a particular need.

Innovative ideas are the foundation of KONSTANT. We continue to develop new components and products to advance the material handling industry.

- **Protect-It** snap-on column protectors
- **Sure-Flo™** carton flow system
- **Load Drawer** pallet picking system
- **Pick Deck** pallet picking system
- **Pick and Return** pallet / container picking system
- **Snap-In Safety Bar** boltless technology

Our design team combines state-of-the-art technology - including 3D imaging and virtual walk-through presentations - with unparalleled knowledge and experience in the storage industry. Coupled with a willingness to work with our customers, KONSTANT is able to thoroughly analyze and recommend the best solution for their individual needs.

## INTEGRATED SOLUTIONS

The KONSTANT Protect-It provides economical and durable rack protection, and is a snap to install.

**Sure-Flo™** is a wide track wheeled carton flow that emulates the simplified site assembly of a full width roller system.

KONSTANT Load Drawer is easy to handle, and offers easy access to awkward and heavy product – creating a more ergonomic picking operation.

KONSTANT'S revolutionary Pick Deck offers easy access to the back half of the pallet in a two level pick arrangement.
