EZ Wire® is the patented "no nuts and bolts" security wire partition system designed to be the most economical and secure system in the industry. The EZ Wire® hook-fastener system makes installation up to five times faster than standard bolted systems. Secure storage is achieved through the strength of MilSpec, 10-Ga., woven wire panels and 2-1/2" steel posts. Unlike bolted partitions, the system cannot be easily defeated with common hand tools.

EZ WIRE® OPTIONS

Doors and Windows Plus Hundreds of Available Locks. Customize An EZ Wire System to Meet Your Specific Needs.

Hammer Drive Pin for A Secure Rivet-Like Connection!

3)

**Machine Screws May Be Used for Temporary Applications*

EZ WIRE® FEATURES

A

"C" Type Frame Bars
Smooth finish, no unsightly welds

B

Ceilings
Perimeter support members attach to panels with self-threading screws. Ceiling panels attach without bolts.

C

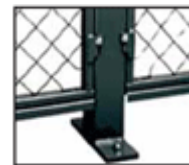

Corner Post
Smooth, attractive 90 degree turns in partitioning. Panels attach inside for added security.

D

Over Channel
Securely seats panels, eliminating need for horizontal bolting.

E

Tubular Posts
14 Ga. 2-1/2" tubular posts are the largest in the industry.
